Who we are

We are an engineering and labour recruitment company that works with passion.

- ❑ Innovation Leaders: Pioneering new solutions and technologies.
- ❑ Problem Solvers: Delivering effective answers to complex challenges.
- ❑ Quality-Driven: Committed to excellence and precision in every project.
- ❑ Sustainable Engineers: Focusing on environmentally responsible and sustainable practices.
- ❑ Collaborative Partners: Working closely with clients and stakeholders to achieve shared goals.

Our history

Maal Empire Holdings was founded by a Director who has a very strong engineering Background. Main areas of their expertise is in Power Generation plants, turbines, generators, High Pressure Valves, Boilers ,pumps and blowers and but not limited to Compressed air systems where he once served as a Field Service Technician on various brands the likes of Ingersoll-Rand, Comair, Caps, Champion, BOGE, Atlas Copco. Apart from Engineering services, Maal Empire Holdings supplies skilled labour professional staff to various industries in Mining, Heavy Engineering, food manufacturing, Milling, Fmcg, Power stations and any other.

After realizing that Engineering services are on demand internationally, a well-trained team, armed with Engineers, Technicians and qualified artisans is always on standby for national and international call outs.

Maal Empire Holdings is always available for all your Engineering services needs like breakdowns, Maintenance staff, Engineering consultancy and many other services not listed.

Maal Empire Holdings does once what other will do last. No history of re works or lost time injuries in record.

Work safe-for your good and others working around you.

MAAL EMPIRE HOLDINGS

Our Values

- ❑ Excellence: Striving for the highest standards in engineering practices.
- ❑ Integrity: Conducting business with transparency and ethical responsibility.
- ❑ Creativity: Encouraging innovative thinking and approaches.-
- ❑ Customer Focus: Prioritizing client and satisfaction.
- ❑ Sustainability: Committing to environment needs mentally conscious engineering solutions.

Visions

Creating solutions through engineering.

Missions

A leading engineering company dedicated to delivering innovative, sustainable, and high-quality solutions that transform ideas into reality, exceeding client expectations through collaborative expertise and a passion for engineering excellence."

Our Services

We Supply Skilled Labour

Engineering services

- ☐ Plant maintenance and services
- ☐ Preventative maintenance
- ☐ Projects execution
- ☐ Laying pipes
- ☐ Pumps and valve services
- ☐ Fault finding
- ☐ Installations
- ☐ Commissioning and De-commissioning
- ☐ Boiler services
- ☐ Air Compressor services
- ☐ Designing
- ☐ Modifications
- ☐ Air conditioning and refrigeration
- ☐ Machining

- ☐ Mechanical Fitters
- ☐ Turner Machinists
- ☐ Welders
- ☐ Riggers
- ☐ Machine tool fitters
- ☐ Electricians
- ☐ Boiler Makers
- ☐ Auto Electricians
- ☐ Diesel Mechanics
- ☐ Mining Staff
- ☐ HD Fitters
- ☐ Sheet Metal
- ☐ Project Planners
- ☐ Instruments Technicians
- ☐ Project Technicians
- ☐ Project Mangers
- ☐ Site Mangers

Office Staff supplies

- ☐ Receptionists
- ☐ Data Clerks
- ☐ Projects Clerk
- ☐ Book keepers
- ☐ Secretary
- ☐ Accounts Clerk
- ☐ Accountants
- ☐ Safety officers
- ☐ Buyers
- ☐ Business Development Managers
- ☐ Project Coordinators
- ☐ Site Managers

AIR COMPRESSOR SERVICES

- ☐ **Diagnosis and Repair:** Identifying and fixing issues with air compressors and related equipment.
- ☐ **Maintenance and Inspections:** Performing routine checks and preventive maintenance to ensure optimal performance.
- ☐ **Installation and Commissioning:** Setting up new compressor systems and ensuring they operate correctly.
- ☐ **Parts Replacement:** Swapping out faulty or worn-out components with genuine parts.
- ☐ **Figuring out problems with compressors,** like leaks or performance issues.
- ☐ **Filter Changes:** Regularly replacing filters to maintain air quality.-
- ☐ **Leak Detection and Repair:** Identifying and fixing air leaks in the system.

POWER PLANTS

- ❑ **Construction:** build power generation facilities like coal, gas, and renewable energy plants.
- ❑ **Plant Engineering and Maintenance:** Providing ongoing engineering support, maintenance, and upgrades for existing power stations.
- ❑ **Equipment Supply and Installation:** Sourcing and installing critical equipment like turbines, generators, and control systems.
- ❑ **Efficiency and Performance Optimization:** Implementing solutions to improve power plant efficiency and output.
- ❑ **Solar panels installation and all wiring**

MINING

Comprehensive mining maintenance services are designed to ensure maximum uptime, safety, and efficiency through a range of scheduled and emergency services. Our services include:

- Preventative Maintenance: Scheduled inspections and servicing of vehicles, drills, and loaders to prevent failures.
- Breakdown Repairs: 24/7 on-site emergency repair services for heavy machinery and systems.
- Component Rebuilds: Rebuilding or repairing large components at specialist workshop facilities.
- Shutdown Maintenance: Managing plant shutdowns for major overhauls and maintenance.
- Structural Repairs: On-site welding, fabrication, and repair of heavy equipment parts.
- Asset Integrity Services: Inspections and maintenance of infrastructure to ensure safety.
- Technical Labor Hire: Providing skilled mechanics, electricians, and technicians.
- Site Machinery Maintenance: Specialized servicing for underground equipment.
- Equipment Commissioning: Installation and setup of new mining machinery.

Testimonials

Mr B Sithole
Happy Client

“An air compressor downtime was reduced by 80 percent.

-Production Manger

Mrs E Moyo
Happy Client

“Very efficient when it comes to staff mobilization.
